validation

regulatory compliance

21 cfr part 11

To create a comprehensive report on [GxP-compliant](#) Calibration, Maintenance, and [Validation Program](#) software (CMMS) for the [life sciences industry](#), could you please clarify the following:

1. Are you interested in global software vendors or only specific to certain regions (e.g., US, EU)?
2. Should the focus be on enterprise-level systems, small-to-medium-sized solutions, or both?
3. Are there specific features or certification standards (e.g., [FDA 21 CFR Part 11](#), ISO 13485) you want the report to emphasize?
4. Do you want a comparison table including pricing, features, and deployment options (cloud vs. on-premise)?
5. Any specific competitors or platforms besides GxPReady! you want to include in the list?

Once I have this information, I'll begin compiling the report.
