AdvancedMD

A unified, cloud-based medical office software suite offering Electronic Health Records (EHR), Practice Management (PM), and Revenue Cycle Management (RCM) for independent practices.

https://www.advancedmd.com/

Overview

AdvancedMD is a comprehensive, cloud-based software-as-a-service (SaaS) platform designed specifically for independent physician practices, mental health, and physical therapy organizations. It unifies clinical, administrative, and financial workflows into a single, integrated suite, which includes Electronic Health Records (EHR), Practice Management (PM), Medical Billing, and Patient Engagement tools. The platform is hosted on Amazon Web Services (AWS) for stability and security.

Key Features and Capabilities: The software is built around a unified workflow experience, automating the patient journey from initial self-scheduling to final billing and collections. It is known for its high degree of customization, offering specialty-specific templates and the ability to tailor workflows to a practice's specific needs. Core capabilities include:

Electronic Health Records (EHR): Customizable templates, e-Prescribing, and mobile EHR for on-the-go access.
Practice Management (PM): Automates appointment scheduling, patient registration, and insurance verification.
Revenue Cycle Management (RCM): Comprehensive medical billing tools, claims management, denial management, and an optional full-service RCM solution (4-8% of collections).
Patient Engagement: Features a comprehensive patient portal for secure communication, online scheduling, and access to health records, along with telemedicine functionality.
Reporting & Analytics: Provides customizable dashboards and a wide range of standard and custom reports for financial, clinical, and operational insights.
Target Users and Use Cases: AdvancedMD primarily targets independent medical practices, including solo practitioners, small groups, and large group practices across various specialties like mental health and physical therapy. Its main use case is to provide an all-in-one solution to manage the entire medical office, ensuring HIPAA compliance while optimizing financial performance and patient care.
