

ALIS

Integrated, cloud-based EHR and operations platform for assisted living, memory care, and independent living communities.

<https://www.alis-software.com>

Overview

Assisted Living Integrated Solution (ALIS), developed by Medtelligent, is a comprehensive, cloud-based Electronic Health Records (EHR) and operations platform purpose-built for assisted living, memory care, and independent living communities. The software streamlines clinical, financial, and operational workflows through a suite of integrated modules: ALIS CRM (relationship management), ALIS Clinical & eMAR (medication management and care), ALIS RevOps (revenue cycle management and billing), ALIS HQ (analytics and reporting), and ALIS Connect (family engagement).

A key differentiator is its focus on ease of use for frontline staff, ensuring complete and accurate data capture. The system supports full eMAR management, drug counting, integrated assessments, and compliance tracking across state lines. It also features 'Ask ALIS', an AI-powered GPT for conversational queries, chart summarization, and on-demand reporting. ALIS is designed to eliminate tedious paperwork, improve staff efficiency, and provide corporate teams with high-level BI dashboards and KPIs for full portfolio oversight.

The platform adheres to HIPAA regulations and maintains robust data security with regular backups and secure, controlled access. It is suitable for organizations of all sizes, though it is particularly well-suited for mid-to-large facilities and growing portfolios.

Key Features

- Electronic Health Records (EHR)
- eMAR Management & Drug Counting
- AI-powered GPT ('Ask ALIS')
- Billing & Revenue Cycle Management (RevOps)
- Care Planning & Integrated Assessments
- Incident Reporting & Risk Management
- Family Engagement Portal (ALIS Connect)

- Staff Scheduling & Task Management
- Compliance Tracking
