

Alivia Analytics

AI-powered platform for healthcare payers to detect and prevent fraud, waste, and abuse (FWA), ensure payment integrity, and optimize claims processes.

<https://www.aliviaanalytics.com/>

Overview

Alivia Analytics provides an AI-powered healthcare data analytics and technology platform, Alivia 360™, designed to help commercial and government health plans (including Medicaid and Medicare) reduce financial losses from fraud, waste, and abuse (FWA) and overpayments. The platform offers a unified solution for payment integrity across the entire claims lifecycle, from pre-payment prevention to post-payment recovery.

Key Capabilities and Features:

Pre-Pay Preventive Analytics (FWA Claims Manager™): Flags high-risk claims and providers before payment using AI-powered edits, scoring, and configurable pend-and-review triggers. This helps to reduce improper payments and streamline early case review.

Post-Pay Recovery Analytics (FWA Finder™): Utilizes AI-driven precision analytics and behavioral modeling to uncover hidden leads, billing anomalies, and non-compliant patterns that traditional rules-based systems often miss, particularly in the "Gray Zone" between error, waste, and fraud.

SIU Case Management (Alivia Case Manager™): A centralized, scalable solution to track, manage, and accelerate the resolution of complex fraud cases and investigation workflows.

Clinical Reviews & Audits: Offers both pre- and post-payment clinical reviews and audits by certified experts to validate medical necessity, coding accuracy, and compliance, with prebuilt audit workflows across areas like DRG and SNF.

Data & IT Transformation (DataChrome™): Provides services to standardize and transform fragmented claims data into analytics-ready formats, modernize core claims platforms, and safeguard Protected Health Information (PHI), supporting systems like HealthRules and TriZetto Facets.

The solution is delivered as both a Software as a Service (SaaS) platform and Tech-Enabled Services, combining technology with deep claims expertise to deliver measurable results and increase

operational efficiencies for payers of all sizes.

Key Features

- AI-Powered FWA Detection & Scoring
- Pre-Pay Preventive Analytics (FWA Claims Manager™)
- Post-Pay Recovery Analytics (FWA Finder™)
- SIU Case Management (Alivia Case Manager™)
- Data & IT Transformation Services (DataChrome™)
- Prospective Claims Editing
- Clinical Reviews & Audits
- Behavioral Modeling

Pricing

Model: enterprise

Pricing is based on a custom, enterprise-level quote. Solutions are delivered as a combination of Software as a Service (SaaS) and Tech-Enabled Services to commercial and government health plans.

Target Company Size: small, medium, enterprise

Integrations

AMISYS, Conduent HSP™, HealthEdge™ / HealthRules™, TriZetto QNXT™, TriZetto Facets™

Compliance & Certifications

HITRUST r2, SOC 2 Type 2, HIPAA, NIST CSF
