

Alora Mobile

An all-in-one, mobile-ready home health software (EHR) solution for clinical documentation, EVV, scheduling, billing, and compliance for field staff and administrators.

<https://www.alorahealth.com>

Overview

Alora Home Health Software is a comprehensive, cloud-based Electronic Health Record (EHR) system designed for home health, home care, and hospice agencies, with **Alora Mobile** serving as the core mobile-ready component for field staff . The platform integrates clinical, operational, and financial workflows into a single, unified system to streamline agency management, enhance efficiency, and ensure regulatory compliance . Key capabilities include Electronic Visit Verification (EVV) with GPS and Telephony options, complete clinical documentation (OASIS, 485, visit notes), and billing for all payer types (Medicare, Medicaid, Managed Care, Private Pay) . Alora Mobile offers native offline applications for iPhone, iPad, Android phones, and tablets, allowing clinicians to document at a patient's home and capture signatures without needing the Internet . The company, founded in 2005, is known for its strong customer support, which includes live agents and virtual one-on-one training, and its solutions are scalable for agencies of all sizes, from startups to large enterprises . Recent developments include AI-powered solutions to streamline clinical documentation .
