---

## Overview

---

AlphaSense is an AI-powered market intelligence and search platform that leverages advanced Natural Language Processing (NLP) and Generative AI to analyze a vast universe of public and private content. It is trusted by over 6,000 enterprises worldwide, including a majority of the S&P 500 and 88% of the S&P 100. The platform aggregates insights from over 500 million premium business documents, such as equity research (Wall Street Insights), earnings call transcripts, SEC filings, expert interviews (Tegus Expert Insights), news, and internal proprietary content.

**Key Benefits** AlphaSense delivers insane time savings by allowing users to find critical disclosures or trends in minutes, not days, and acts as a one-stop data shop, eliminating the need to juggle multiple subscriptions. It enables faster, smarter decision-making by providing comprehensive, real-time data and advanced analytics, helping professionals stay ahead of market trends.

### Main Features and Capabilities

**AI-Powered Search:** Utilizes proprietary AI and Smart Synonyms to deliver precise, context-aware results across unstructured data.

**Generative AI:** Features like Generative Search, Generative Grid, and Deep Research provide fully-cited, analyst-level insights, memos, and reports, compressing weeks of analysis into minutes.

**Federated Search (Enterprise Intelligence):** Securely searches across AlphaSense's premium content library and the client's proprietary internal content (memos, notes, decks) simultaneously, with internal content never leaving the client's network.

**Content Universe:** Access to Wall Street Insights (equity research), Tegus Expert Insights (expert call transcripts), and comprehensive regulatory filings.

**Monitoring & Collaboration:** Customizable Dashboards, real-time Alerts, Sentiment Analysis, and tools for annotation, highlighting, and note sharing.

**Target Users and Use Cases** The platform is primarily designed for professionals in finance, consulting, and corporate strategy, with specific solutions for Investment Banking, Private Equity, Asset Management, Venture Capital, and **Life Sciences & Healthcare**. Use cases include investment research, due diligence, competitive intelligence, corporate strategy, market forecasting, and tracking therapeutic pipelines.
