Ambiki Pediatric

All-in-one HIPAA-compliant EMR and practice management software for pediatric SLPs, OTs, and PTs, featuring AI-enhanced documentation (Tenalog®).

https://ambiki.com

Overview

Ambiki Pediatric is an all-in-one, HIPAA-compliant Electronic Medical Record (EMR) and practice management solution specifically designed for pediatric Speech-Language Pathologists (SLPs), Occupational Therapists (OTs), and Physical Therapists (PTs). The platform was launched in 2022, spinning out of a successful therapy practice, and its development is grounded in clinical experience, created by a team of clinicians and developers.

Key Benefits and Value Proposition: Ambiki aims to streamline practice workflows, reduce administrative burden, and elevate the standard of care by consolidating all crucial workflows—documentation, scheduling, billing, and patient engagement—into a single, unified system. Its proprietary AI-Enhanced Clinical Documentation system, Tenalog®, is a core feature that assists in creating detailed SOAP notes, automatically tracking goals, and generating parent-friendly summaries, which helps to reduce therapist burnout.

Main Features and Capabilities:

AI-Enhanced Documentation (Tenalog®): Automatically generates detailed transcripts, SOAP notes, progress tracking, and parent-friendly summaries.
Integrated Billing & Claims Management: Manages all billing needs, including insurance claim filing, invoice generation, superbills, private payment collection, and automatic ERA matching, partnering with Availity as a clearinghouse.
HIPAA-Compliant Teletherapy: A custom-built teletherapy platform with built-in engagement tools like a whiteboard, visual schedules, games, and a resource library.
Custom Form Builder: Allows practices to create tailored clinical documentation and intake paperwork with customizable tables and formatting.

Secure Patient Portal: Simplifies intake, allows for secure payment methods, and enables families to view appointments and summaries.

Integrated Payroll: Automatically calculates pay based on set rates and services performed.

Target Users and Use Cases: Ambiki is suitable for practices ranging from solo/part-time clinicians to multi-location clinics with over 100 employees, offering a solution that evolves with the practice's growth. Primary use cases include Practice Management for Pediatric Therapy Clinics, Clinical Documentation and EMR, Teletherapy Sessions, Insurance Billing and Payment Processing, and Automated Progress Tracking.
