

AmbuPro

A cutting-edge, NEMSIS Compliant electronic patient care reporting (ePCR) software designed to streamline EMS operations and enhance patient care.

<https://ambupro.net/>

Overview

AmbuPro EMS is a dependable, powerful, and user-friendly electronic patient care reporting (ePCR) software solution developed by OCI Software for serious ambulance professionals. It is engineered to streamline Emergency Medical Services (EMS) operations, enhance patient care, and provide efficient and accurate documentation.

Key Capabilities and Features

AmbuPro is a highly customizable and integrated ePCR system that offers a wide variety of features designed to meet and exceed the needs of pre-hospital healthcare providers at all levels of service. It is NEMSIS Gold Compliant, ensuring adherence to industry standards and improving compliance with regional and state requirements. The software is equipped with rapid, AI-driven data entry and conditional guidance and validation for all mandatory fields, maximizing efficiency and minimizing errors. Key features include:

Electronic Patient Care Reporting (ePCR): Fast and effortless data entry with customizable forms.

Mobile Access & Offline Capability: Exclusive synchronization allows crews to access prior patient encounters and document incidents in the field *without* an internet connection.

Data Management & Analytics: Real-Time Data Sync, advanced analytics, custom reporting, and Dashboard Reports for tracking field performance, administrative oversight, and emerging trends.

Operational Tools: Scheduling, Inventory Management, Patient Tracking, Incident Reporting, and Quality Assurance.

Financial & Compliance: Billing Integration, NEMSIS Compliance, Electronic Signature, and Audit Trails.

Target Audience and Deployment

AmbuPro EMS serves a wide range of businesses, including StartUps, SMEs, Agencies, and Enterprises. Its target users are EMS professionals, administrators, and supervisors. The solution is flexible, supporting multiple deployment models including cloud-hosted (SaaS) and on-premise (desktop) installations. It is accessible via web browsers and dedicated mobile applications for iOS and Android.

Key Features

- Electronic Patient Care Reporting (ePCR)
- NEMSIS Compliance
- Mobile Access with Offline Capability
- Billing Integration
- Data Analytics and Dashboard Reports
- Customizable Forms
- Real Time Data Sync
- Inventory Management
- Scheduling
- GPS Integration

Pricing

Model: enterprise

Pricing is not publicly disclosed and is provided via a custom quote based on the agency's specific requirements. Support and training are often included with the purchase.

Target Company Size: startup, small, medium, enterprise

Integrations

Billing Systems, Other EMS Systems (Interoperability)

Compliance & Certifications

NEMESIS Gold Compliant
