ASTeR

All-in-one patient and practice management software featuring a specialty EHR and agentic voice AI for healthcare clinicians.

https://example.com/1762583716455

Overview

Aster (by Aster Solutions Inc.) is a healthcare technology platform designed to reduce administrative burden for private practices, health systems, and group practices. The platform offers two primary products: **Aster - EHR** (a specialty Electronic Health Record platform) and **Atlas - Voice AI Agent** (an agentic voice agent tool that can integrate with any existing EHR).

Key Features & Capabilities:

Agentic Voice AI: Automates front-office tasks using AI voice agents.
Appointment Scheduling: AI agents read live availability and schedule appointments for new and existing patients.
No-Show Reduction: Outbound AI works to proactively reduce no-show rates.
Insurance Verification: Real-time verification of patient insurance coverage and eligibility.
Lab Result Management: Helps manage and deliver lab results to patients and providers.
Specialty EHR: The Aster EHR platform has a specialty focus, for example, in maternal health.
The system is cloud-deployed and designed for rapid proficiency, with most providers becoming proficient within 1-2 hours of training. It is fully HIPAA compliant and maintains comprehensive Business Associate Agreements (BAAs) with its partners.

Target Users: Private practices, health systems, and group practices looking to scale their front-office operations and improve patient engagement through automation.

Key Features
