

AZZLY Peer Support

All-in-one EHR, RCM, and Patient Management platform for behavioral health and addiction treatment, featuring dedicated peer support tools.

<https://azzly.com>

Overview

AZZLY Peer Support is a core component of the **AZZLY Rize™** platform, an all-in-one Electronic Health Record (EHR), Practice Management (PM), and Revenue Cycle Management (RCM) solution purpose-built for the behavioral health and addiction treatment industry. The platform is designed to serve all levels of care (LOC), including residential, outpatient, detox, and Medication-Assisted Treatment (MAT).

Peer Support Capabilities: AZZLY Rize delivers a seamless and HIPAA-secure experience for Peer Support Services. Peer Support staff can make efficient and secure contributions directly to the patient chart, and administrators can set role-based limitations for access. The system's configurable forms and workflows help programs comply with emerging standards for peer support services, including documentation requirements for potential reimbursement.

Key Benefits & Features:

All-in-One Platform: Integrates clinical documentation, scheduling, patient engagement, and billing/claims into a single system, eliminating the need for disparate software.

Revenue Cycle Management (RCM): Includes features like eligibility checks, authorization tracking, claims scrubbing, denial management, and auto-generation of claims, boasting a reported 98% first-time pass rate.

Medication Management: Features eMARs (Electronic Medication Administration Records), eMORs (Electronic Medication Observation Records), ePrescribing (eRx), EPCS (Electronic Prescribing of Controlled Substances), and PDMP (Prescription Drug Monitoring Program) integration.

Patient Engagement Portal (PEP): Allows for digital intake/admissions, e-signatures, secure two-way messaging, and access to schedules and care plans on any device.

Compliance: Built-in features ensure compliance with regulatory standards from bodies like The Joint Commission (TJC) and CARF, and the platform is ONC-Certified.

Mobility: Cloud-based and mobile-friendly design allows access and documentation on computers, tablets, and phones.

Key Features

- Peer Support Documentation & Messaging
- All-in-One EHR, PM, and RCM
- Integrated Telehealth (Zoom)
- Medication Management (eMAR/eMOR, ePrescribing)
- Patient Engagement Portal (PEP)
- Automated Billing & Claims Management
- Configurable Forms and Workflows
- AI-Assisted Documentation (DAX Copilot/Dragon Medical One)

Pricing

Model: subscription

Subscription-based with three customizable monthly packages: Basic, Pro, and Enterprise. Pricing is per-user and not publicly disclosed; contact AZZLY for a personalized quote.

Target Company Size: startup, small, medium, enterprise

Integrations

Zoom, DrFirst/Rcopia Engine, Availity EDI Clearinghouse, TSYS/GPI Merchant Services, DAX Copilot, Dragon Medical One

Compliance & Certifications
