

BellMedEx

HIPAA-compliant medical billing and Revenue Cycle Management (RCM) platform with integrated, customizable EHR/EMR and Practice Management software.

<https://bellmedex.com>

Overview

BellMedEx is a full-service medical billing and Revenue Cycle Management (RCM) company that also provides a cutting-edge, HIPAA-compliant, cloud-based software platform. The platform includes a customized Electronic Health Record (EHR) system and Practice Management Software (PMS), which are offered for free when using their RCM services.

Key Value Proposition: BellMedEx is known for its exceptional RCM performance, boasting a proven track record of reducing denial rates by up to 30% and achieving an impressive 98% clean claim rate. This focus on efficiency and accuracy leads to faster payments and improved cash flow for healthcare providers. The company serves over 90 medical specialties and is designed for a smooth transition with minimal downtime, claiming a switch-over time of as little as 5-6 days.

Main Features and Capabilities:

Revenue Cycle Management: Claims management, claims scrubbing, electronic claims submission, payment processing, and denial management.

EHR/EMR: Clinical documentation, e-prescribing, lab integration, patient history, and customizable templates.

Practice Management: Appointment scheduling, patient portal, patient management, insurance verification, and real-time reporting and analytics.

Compliance & Security: HIPAA compliance, 2-Factor Authentication, SSL protocols, and secure messaging.

Connectivity: API availability for external integrations and mobile access for on-the-go management.

Target Users and Use Cases: BellMedEx targets a wide range of healthcare providers, from solo practitioners and startups to medium and large enterprise-level practices and hospitals. Primary use cases include outsourcing the entire RCM cycle, utilizing the integrated EHR/PMS for clinical and administrative workflows, and leveraging the software's automation features to improve billing accuracy and speed.
