billrMD

billrMD Invoicing

Web-based medical billing and practice management software designed to streamline the revenue cycle, patient invoicing, and claims submission for healthcare providers.

https://www.billrmd.com

Overview

billrMD is a comprehensive, cloud-based Practice Management (PM) and Revenue Cycle Management (RCM) solution tailored for medical practices, billing companies, laboratories, and Independent Diagnostic Testing Facilities (IDTFs).

Product Overview & Key Benefits The platform is a 100% web-based, HIPAA-compliant application, eliminating the need for additional software downloads and providing 24/7 accessibility from any internet-connected PC. It is designed to simplify and automate the entire revenue cycle, leading to increased billing accuracy, enhanced efficiency, and faster reimbursements.

Main Features and Capabilities

Patient Invoicing & Billing: Create, customize, and track patient invoices effortlessly. Supports balance and ledger statement formats and allows for personalized branding.

Electronic Claims Submission: Features an integrated clearinghouse for submitting error-free claims to insurance companies and government payers.

Revenue Cycle Management (RCM): Includes claims scrubbing, denial management, and Electronic Remittance Advice (ERA) for simplified payment reconciliation.

Practice Management: Offers a robust, customizable scheduler with drag-and-drop functionality and automated appointment reminders (via text/email) to reduce no-shows.

Financial Insights: Provides customizable reports and real-time analytics to track key billing metrics, monitor claim statuses, and analyze payment trends.

Patient Engagement: Includes a HIPAA-compliant Patient Portal and a dedicated Patient App (for iOS/Android) for patients to view statements, make secure payments, and manage appointments.

Credit Card Processing: Facilitates secure online payments via credit cards, debit cards, or bank transfers with automatic reconciliation.

Target Users and Use Cases It is particularly well-suited for **startup, small, and midsize medical practices**, as well as **billing companies, laboratories, and IDTFs** looking for an affordable and scalable solution to manage their revenue cycle and practice operations efficiently.
