

Cantata Health

Modern, integrated EHR and care collaboration platform, Arize, for behavioral health, human services, and post-acute care.

<https://cantatahealth.com>

Overview

Cantata Health Solutions provides Enterprise Health Management software, centered around its flagship product, **Arize EHR**. Arize is a modern, cloud-native Electronic Health Record and care collaboration platform purpose-built for the complex needs of behavioral health, human services, and post-acute care organizations. It unifies clinical, billing, medication management, and client engagement tools into a single, highly configurable system.

Key Benefits & Capabilities:

Integrated Platform: Arize eliminates the need for multiple, disparate systems by combining EHR, Revenue Cycle Management (RCM), and Closed-Loop Medication Management into one solution, driving efficiency and data consistency.

Configurability: The platform is designed to be easily configured by end-users to adapt to existing workflows, reducing reliance on vendor support and minimizing disruption during implementation.

Mobile Functionality: Arize is a mobile-first solution, offering full functionality on any device (web, iOS, Android), enabling real-time updates and supporting community-based and in-the-field services.

Advanced Features: It includes cutting-edge tools like integrated telehealth, AI-powered clinical chart summaries for rapid review, and a comprehensive client engagement portal that allows clients to securely access and complete documentation.

Financial Management: The robust RCM module helps providers streamline billing, reduce claim denials, and gain analytical foresight to improve financial health.

Target Users & Use Cases: Arize is primarily used by behavioral health centers, human services organizations, acute care settings, post-acute care facilities, and long-term care providers (SNF/ALF/ILF) who require a person-centered, coordinated care approach.
