

Care Coordinations Platform

The HIPAA-compliant, AI-enabled SaaS platform for post-acute care coordination, designed to streamline communication and enhance patient outcomes.

<https://carecoordinations.com>

Overview

The Care Coordinations Platform is a robust, scalable Software-as-a-Service (SaaS) solution specializing in post-acute care coordination for home health and hospice agencies. The platform is designed to address the unique challenges of the post-acute care continuum, focusing on improving care quality, reducing healthcare costs, and boosting staff and patient engagement. It is a HIPAA-compliant, AI-enabled system that acts as a central hub for all stakeholders: healthcare providers, back-end staff, patients, and their families.

Key Features & Capabilities:

Secure & Real-Time Communication: Centralized, HIPAA-compliant channels for secure messaging, image, and document sharing between patients, caregivers, and the entire care team.

AI-Enabled Workflows: Leverages artificial intelligence for predictive insights, automated workflows, and reduced administrative friction, saving clinicians an estimated 12-15 minutes daily.

EHR Interoperability: Seamless integration with Electronic Health Records (EHRs), including specific integration with HomeCare HomeBase (HCHB) EMR, to ensure continuity of care and data syncing.

Automated Scheduling & Reminders: Manages and automates appointment scheduling, reminders, and coordination of transportation.

Patient & Caregiver Engagement: Provides a dedicated portal for patients and caregivers to access care plans, track progress, manage medications, and utilize self-management tools like remote monitoring device integration.

Analytics & Reporting: Offers real-time data analytics and reporting for improved care outcomes, resource utilization, and proactive care management to reduce hospital readmissions.

Target Users & Use Cases: The platform is primarily built for the **post-acute care industry**, including home health and hospice agencies of any size. Its core use cases involve streamlining care transitions,

improving patient satisfaction (CAHPS Score), and enhancing staff productivity and accountability through a unified, secure communication network.

Key Features

- HIPAA-Compliant Secure Platform
- AI-Enabled Workflows & Predictive Analytics
- EHR Interoperability & Integration
- Real-Time Secure Communication (Chat/Audio/Video)
- Automated Appointment Scheduling & Reminders
- Patient & Caregiver Portal
- Medication Tracking & Reminders
- Analytics and Reporting for Outcomes

Pricing
