

Caremerge

A cloud-based EHR and engagement platform for the senior living industry, connecting residents, staff, and families.

<https://www.caremerge.com>

Overview

Caremerge provides a comprehensive, all-in-one suite of clinical and engagement solutions tailored for the senior living industry, including Assisted Living, Independent Living, Memory Care, and Continuing Care Retirement Communities (CCRC). The platform is designed to eliminate communication silos and foster collaboration between residents, staff, and families.

Core solutions include the **Senior Living EHR** (Electronic Health Record) and **eMAR** (Electronic Medication Administration Record) to streamline clinical documentation, reduce billing errors, and improve operational efficiencies. The **Family Engagement Portal** and **Community Engagement Platform** offer HIPAA-compliant secure messaging, real-time activity attendance tracking, and digital signage to keep everyone informed and connected.

Key capabilities also include **Calendar Central** for activity planning and scheduling, **Chronic Care Management** for enhanced care coordination with primary care physicians, and **Voice Services** via Amazon Alexa integration for resident interaction. The system is cloud-based, mobile-friendly, and offers a robust API for integration with other healthcare and business systems, making it a powerful tool for digital transformation in senior care.
