CarePaths

Cloud-based, ONC-certified EHR and practice management solution for behavioral health, featuring Measurement-Based Care (MBC) and teletherapy.

https://carepaths.com

Overview

CarePaths EHR is a comprehensive, cloud-based electronic health record and practice management system designed specifically for mental and behavioral health professionals, including psychiatrists, psychologists, counselors, and social workers. Founded in 2000, the platform is ONC 2015 Cures Edition certified and HIPAA-compliant, ensuring secure and compliant operations.

The system is known for its integrated Measurement-Based Care (MBC) tools, which automate client assessments and outcomes monitoring to improve clinical effectiveness. Key features include a fully integrated suite for clinical documentation (with AI-assisted notes and custom templates), electronic billing (with free claims submission, eligibility verification, and automated remittance), online scheduling (with free SMS reminders), and a secure teletherapy platform (with group support).

The CarePaths Connect mobile app and patient portal enhance patient engagement by allowing clients to self-schedule, complete forms, pay invoices, and engage in teletherapy and secure messaging. The platform is scalable, supporting solo practitioners up to large multi-center organizations, and offers special pricing for students and part-time therapists.
