## Overview

CenseoRx is a specialized Computerized Provider Order Entry (CPOE) and Clinical Decision Support System (CDSS) developed by CibusMed for the comprehensive management of chemotherapy. The software is designed to cover the entire chemotherapy workflow, from initial prescription to final production and administration.

Its core value proposition is the enhancement of patient safety and quality of care through automation, thorough documentation, and error avoidance. CenseoRx achieves this by utilizing a dynamic, up-to-date database of oncology protocols and allowing for the creation of custom protocols, ensuring a uniform approach for all orders. The system performs precise calculations and provides critical insights on prescriptions, dilutions, and drug administration procedures, which helps to almost halt human errors and enhances safety through drug compatibility and stability checks.

**Key Benefits:**

**Enhanced Safety:** Minimizes errors through precise calculations and adherence to structured, approved protocols.
**Workflow Efficiency:** Streamlines the process by sending orders directly to the pharmacy, significantly decreasing the time between prescribing and making dilutions, resulting in shorter patient waiting times.
**Comprehensive Documentation:** Provides paper-free reporting and detailed documentation of patient data and therapy schedules.
**Clinical Support:** Guides healthcare providers to better decision-making with a robust scientific basis. CenseoRx is designed by pharmacists for pharmacists and other healthcare professionals involved in oncology. It is licensed to health care facilities globally, including hospitals, health clinics, and compounding centers, to modernize their order and production processes.

## Key Features

- Chemotherapy Prescription Management

- Oncology Protocol Database (Customizable)

- Automated Dosage and Dilution Calculations

- Clinical Decision Support System (CDSS)

- Drug Compatibility and Stability Checks

- Workflow Streamlining (Prescription to Production)

- Detailed Therapy Schedule Generation

- Paper-Free Documentation and Reporting

- Error Avoidance and Safety Enhancement

## Pricing

**Model:** enterprise

Pricing is not publicly disclosed and is typically based on an enterprise licensing model for hospitals and healthcare facilities. Contact CibusMed for a customized quote.

**Target Company Size:** medium, enterprise

## Compliance & Certifications
