

Censis CensiTrac

Comprehensive, web-hosted surgical asset management and instrument-level tracking system for sterile processing departments.

<https://censis.com/solutions/censitrac/>

Overview

Censis CensiTrac is a leading surgical instrument and asset management software designed for Sterile Processing Departments (SPD) and Operating Rooms (OR) in hospitals and ambulatory surgical centers. It is the first surgical instrument tracking system built to track assets down to the individual instrument level.

The platform provides full control of surgical inventory, empowering teams to track instruments throughout the entire perioperative loop, from decontamination and assembly to sterilization and the operating room. Key modules like **InstrumentTrac** (instrument-level tracking), **TrayTrac** (tray/set tracking), **ScopeTrac Advanced** (endoscope reprocessing management), and **SterilTrac** (sterilization recordkeeping) ensure accountability and compliance.

Key Benefits and Capabilities:

Compliance & Patient Safety: Captures all sterilization records required for accreditation and infection prevention, and offers superior recall capabilities.

Operational Efficiency: Features a seamless OR Scheduler Interface for real-time case tracking, which prioritizes instrument set reprocessing and enhances OR efficiency and start times.

Staff Management: Includes competency verification logic to ensure technicians are properly trained for specific tasks and equipment.

Advanced Analytics: Leverages CensisAI² for next-generation interactive data and actionable intelligence to optimize healthcare asset management.

Censis Technologies, the developer, is deployed in over 1,300 hospitals in the United States, Canada, and Australia.

Key Features

- Instrument-level Tracking (InstrumenTrac)
- Tray/Set Assembly Management (TrayTrac)
- Flexible Endoscope Reprocessing Tracking (ScopeTrac Advanced)
- Sterilization Recordkeeping (SterilTrac)
- OR Scheduler Interface for Real-Time Case Tracking
- Staff Competency Management and Verification
- Advanced Analytics and Reporting (CensisAI²)
- Mobile Equipment Asset Tracking (MobileTrac)

Pricing

Model: enterprise

Enterprise-level annual subscription model. Pricing is not publicly disclosed and is customized per facility. Federal contracts indicate annual license fees starting around \$23,800 for tray-level tracking. Contact vendor for specific pricing.

Starting at: USD \$23803.53

Target Company Size: enterprise

Integrations

OR Scheduler Interface, Major Electronic Health Record (EHR) Systems, oneSource, Belimed SmartHub
