

Clarivate FoundationIP

Cloud-based IP lifecycle management solution for law firms, automating patent, trademark, and copyright docketing and portfolio management.

<https://clarivate.com/>

Overview

Clarivate FoundationIP is a leading, cloud-based Intellectual Property Management System (IPMS) specifically designed for high-performing law firms and IP professionals. It is described as the first SaaS-based IP management solution in the market, built to increase team efficiency by leveraging automation, best-in-class country rules, and industry-leading data.

Key Benefits and Value Proposition:

Risk Reduction: The platform helps reduce risk by providing access to reliable Clarivate IP data and automatically applying law updates and recalculations three times a year, covering over 300 jurisdictions.

Efficiency and Automation: It automates time-consuming manual tasks, such as one-click docketing from USPTO Private PAIR and email docketing, to free up staff for high-value work. The system also features Server-side Word Forms to generate documents in seconds.

Strategic Insight: FoundationIP includes powerful dashboards and reporting tools that allow firms to uncover actionable insights, measure firm KPIs, and provide enhanced value to clients.

Collaboration: It enables seamless collaboration with clients, colleagues, and agents worldwide, further simplified by integration with the Clarivate IP Collaboration Hub.

Target Users & Use Cases:

Target Users: IP Attorneys, Paralegals, Legal Operations Teams, and IP Professionals within law firms.

Use Cases: IP lifecycle management, Patent portfolio management, Trademark portfolio management, Copyright management, Docketing and deadline management, Client reporting and analytics, Foreign filing and prosecution management.
