

ClinSphere Total Enrollment

SaaS solution for clinical trial participant recruitment and retention with centralized management and real-time data insights.

<https://www.wcgclinical.com>

Overview

WCG's ClinSphere Total Enrollment is a Software-as-a-Service (SaaS) technology designed to streamline participant recruitment and retention for clinical studies. It is built on the WCG ClinSphere technology platform, which is a unified, cloud-based system leveraging data, insights, and Artificial Intelligence (AI) to connect sites, sponsors, CROs, and participants. The solution provides centralized management and real-time visibility, allowing study managers to quickly assess study progress and make informed decisions to drive success. It is built to scale for studies of any size, from small-scale trials to global multi-site studies.

Key Features and Capabilities

Centralized Management and Control: Simplifies participant tracking and automates retention tasks for research sites, minimizing operational disruption and streamlining communication with sponsors and CROs.

Real-Time Insights & Enhanced Reporting: Provides access to live recruitment and retention data for smarter, faster decision-making and offers detailed, standardized reports on study progress and site performance.

Self-Serve Management: Sponsor administrators can efficiently set up, manage, and deploy recruitment and retention programs.

Customizable Chart Reviews: Forms are optimized to prequalify participants more accurately, capture disqualification reasons, and streamline referral workflows.

Referral-Agnostic Tracking: Tracks participants from any referral source, maximizing recruitment reach without adding complexity.

Seamless Integration: Integrates easily with external referral systems, EMRs, and other clinical systems.

Target Users and Use Cases

ClinSphere Total Enrollment is designed for **Sponsors, CROs (Contract Research Organizations), and Research Sites**.

Sponsors gain full visibility into recruitment metrics and retention rates to proactively manage enrollment timelines and optimize outcomes across all sites.

Research Sites benefit from simplified participant tracking and automated retention tools, allowing them to focus on participant care.

Key Features

- Centralized Participant Management
- Real-Time Recruitment and Retention Insights
- Self-Serve Program Deployment
- Referral-Agnostic Tracking
- Customizable Prequalification Chart Reviews
- Automated Retention Tasks
- Seamless EMR and Clinical System Integration
- Enhanced Reporting and Site Performance Metrics

Pricing

Model: enterprise

Pricing is not publicly disclosed and is available upon request via a fee schedule/consultation, typical for enterprise clinical solutions.

Target Company Size: medium, enterprise

Integrations

external referral systems, EMRs, other clinical systems

Compliance & Certifications

ISO 9001, FDA 21 CFR Part 11
