

CME Tracker

A comprehensive, customizable continuing medical education (CME) management system for organizations and associations.

<https://www.cmetracker.com/>

Overview

CME Tracker is a dynamic and flexible software solution designed to meet the ever-changing requirements of continuing education for healthcare organizations, associations, and accredited providers. It offers a comprehensive, module-based platform for managing the entire CE workflow, from activity planning and registration to accreditation reporting and learner self-service. The system is available à la carte or in packages, allowing organizations to choose the features that meet their specific needs.

Key Features and Capabilities

The core **CME Tracker Staff Edition** includes features essential for CE professionals, such as Activity Management, Accreditation Management, Maintenance of Certification (MOC)/Specialty Boards reporting, and full support for ACCME Program and Activity Reporting System (PARS) and Joint Accreditation Interprofessional Continuing Education (JA-PARS) data. It also includes an Analytics Dashboard for visualizing data and trend analysis, customizable workflows, financial tracking, speaker handling, and comprehensive reporting.

The **Learner Self-Service** portal is mobile-friendly and provides a branded online site for learners. It supports complete registration, e-commerce, activity check-in (including Text-in Attendance), online MOC flow, and access to transcripts and past certificates. The system tracks both osteopathic and allopathic CME, including Category 1, Category 2, Category A, and Category B credits.

Target Users and Use Cases

CME Tracker is utilized by a wide range of organization types, including Startups, Small Businesses, Mid-Size Businesses, Enterprise, Nonprofit, and Government entities. It is particularly well-suited for state associations and organizations that need to manage complex licensure requirements and report data to accrediting bodies like the AOA and ACCME. The platform is designed to be a centralized hub for all CME-related information, enhancing the overall educational process for staff and learners.
