

DocVilla ERA

An integrated Electronic Remittance Advice (ERA) feature within the DocVilla all-in-one EHR/RCM platform for automated payment posting and streamlined medical billing.

<https://www.docvilla.com>

Overview

DocVilla ERA is the Electronic Remittance Advice component of the comprehensive, cloud-based DocVilla platform, which integrates Electronic Health Records (EHR), Practice Management (PM), and Revenue Cycle Management (RCM) into a single solution. The ERA feature is designed to revolutionize medical billing by automating the reconciliation of payments and adjustments from insurance payers, which eliminates the need for manual data entry of Explanation of Benefits (EOB) and significantly accelerates the revenue cycle.

Key Capabilities of DocVilla ERA:

Automated Payment Posting: Automatically posts payments to patient accounts based on the electronic remittance advice, reducing manual errors and saving staff time.

Detailed Financial Information: Provides comprehensive details on payments, adjustments, and reasons for claim denials or partial payments, enabling effective denial management.

Seamless Integration: Fully integrated with the DocVilla EHR and billing software, ensuring a unified platform for managing claims, payments, and financial reports.

Enhanced Reporting: Generates detailed reports to provide insights into payment trends and financial performance.

The broader DocVilla platform, which includes the ERA functionality, is an all-in-one health technology solution that is highly customizable and scalable for solo practitioners, small to mid-sized practices, and large hospital systems. It is a HIPAA-compliant, web and cloud-based system that also offers features like integrated telemedicine, e-prescribing (including EPCS), patient portals, and inventory management.

Key Features

- Automated ERA Posting
- Electronic Claim Filing (CMS 1500)
- Real-time Eligibility Verification
- Denial Tracking and Management
- Integrated Patient Portal
- Telemedicine (Video Consults)
- e-Prescribing (eRx and EPCS)
- Customizable EHR Templates
