Overview

ECP Move-Ins is a dedicated software solution designed to simplify and accelerate the resident move-in process for senior living communities, including assisted living, independent living, and memory care. The software is a module within the broader ECP (Extended Care Professional) all-in-one platform, which also includes eMAR, EHR, CRM, and Billing functionalities.

The primary value proposition of ECP Move-Ins is to replace scattered, paper-based processes with a connected, centralized, and user-friendly system. It ensures that every required document, approval, and task is completed on time, which helps to ensure compliance and avoid delays. The platform eliminates manual paperwork by utilizing digital signatures.

Key Features and Capabilities:

Automated Workflows: Provides task lists tailored to a community's needs, ensuring every step of the admissions process is accounted for and staff are made more efficient.

Digital Signatures: Allows for the collection and storage of signatures directly within the system, eliminating the need for manual paperwork.

Family/Resident Portal: Puts key tools in the hands of families, allowing them to complete essential tasks and making the transition process smoother, which reduces staff workload.

Seamless Integration: Integrates with ECP's Clinical and CRM tools, ensuring resident information flows automatically into the care system post-move-in, eliminating duplicate data entry.

Compliance Tracking: Helps communities ensure compliance by tracking all required documentation and approvals.

ECP is trusted by over 8,000 senior living communities nationwide and is known for its excellent customer service and user-friendly interface.

Key Features

- Digital Signatures and Paperless Forms
- Automated Task Management and Workflows
- Compliance and Document Tracking
- Centralized Admissions Process
- Family/Resident Portal
- Integration with ECP Clinical and CRM
- Lead and Occupancy Tracking
