# Eldermark

Centralized, cloud-native software suite for senior living, integrating EHR, eMAR, billing, and predictive analytics.

https://www.eldermark.com

## Overview

Eldermark is a comprehensive, cloud-native software platform designed specifically for the senior living industry, with over 30 years of experience . The platform, including the latest version Eldermark NEXT, centralizes all technology needs—such as Electronic Health Records (EHR), Electronic Medication Administration Records (eMAR), billing, financial management, resident engagement, and Customer Relationship Management (CRM)—into one cohesive system . This eliminates data silos and communication gaps, providing senior living teams with actionable, data-driven insights (ElderSmarts Analytics) to improve care, optimize financial results, and streamline operations .

Eldermark NEXT leverages AI and analytics to provide predictive and prescriptive insights, helping to identify potential business and care risks and automatically recommend corrective actions . Key benefits include generating an additional $1,263 in revenue per resident each month and saving 56 hours in admin work . The software is mobile-responsive, allowing staff to manage operations from a laptop, tablet, or mobile device, and it is built with greater security, reliability, and scalability . It is a HIPAA-compliant solution that supports regulatory compliance and is suitable for all senior living operators, from a single location to hundreds of communities .
