Empower EMR

AI-powered, all-in-one electronic medical record (EMR) and practice management software designed specifically for outpatient Physical Therapy (PT) clinics.

https://www.empoweremr.com

Overview

Empower EMR is a comprehensive, cloud-based medical software solution built to streamline the daily practice workflows of outpatient Physical Therapy (PT) practices of all sizes. The platform is recognized for its deep automation capabilities and AI-driven features, which are designed to reduce administrative burden, speed up charting, and optimize operational efficiency.

Key Features and Capabilities

Empower EMR provides a centralized suite of solutions covering all aspects of practice management:

AI & Automation: Includes AI-powered documentation scribing, automatic wait-list management, and automated ERA posting to maximize efficiency and compliance.

Documentation/EMR: Fully customizable documentation, faster notetaking, and built-in Medicare compliance tools to ensure audit readiness.

Billing & Revenue Cycle Management (RCM): Built-in billing with claim scrubbing, insurance claim billing, unlimited clearinghouse, and financial reporting tools. It supports both in-house and outsourced billing.

Scheduling & Appointment Management: Highly visual scheduling system, online booking, and unlimited email/text reminders to reduce no-shows.

Patient Engagement: Supercharged Patient Portal, Virtual Check-In, Secure Patient Conversations, and a Home Exercise Program (HEP) module.

Practice Management: Comprehensive Analytics, Full KPI Dashboard, Team Communication Tools, and Built-in Automated Marketing.

Target Users and Use Cases

The software is 100% focused on Outpatient PT and is suitable for practices of all sizes, from solo practitioners and startups to well-established multi-location enterprises. Its primary use cases include: Outpatient Physical Therapy Practice Management, Revenue Cycle Management, Clinical Documentation, and Patient Engagement.
