

# EMResource

All-in-one real-time healthcare capacity and situational awareness management tool for acute care and emergency response.

<https://www.juvare.com>

---

## Overview

---

EMResource is Juvare's enterprise-grade, real-time resource management platform, designed to provide a common operating picture and comprehensive situational awareness across the entire healthcare ecosystem. It is a mission-critical solution used by hospitals, EMS agencies, long-term care facilities, public health agencies, hospital associations, and healthcare coalitions in over 30 states.

The platform's core value proposition is enabling coordinated care and resource management during both daily operations and large-scale emergencies, such as mass casualty incidents (MCIs), patient surges (e.g., flu season), and disaster response. It tracks a wide range of critical healthcare assets and statuses, including:

- Hospital bed availability (by specialty like stroke, trauma, burn)

- Ventilator and Personal Protective Equipment (PPE) counts

- Vaccine and pharmaceutical stock levels

- Facility operational status and diversion status

- Emergency Department (ED) overcrowding and patient saturation scores

EMResource automates data collection and reporting, including support for HHS data submission requirements and NHSN data submission, significantly reducing the manual burden on healthcare workers. The solution features a customizable, intuitive interface, an API for seamless data integration with partner agencies, and a dedicated mobile app (EMResource Mobile for iOS and Android) for on-the-go status updates and event management. This integrated approach ensures all stakeholders are working from the same, accurate data for informed, life-saving decisions.

## Key Features

---

- Real-time Capacity Dashboards
- Healthcare Asset Tracking (Beds, Ventilators, PPE)
- Multi-Agency Collaboration Platform
- Event and Incident Management
- Automated Data Collection via API
- HHS/NHSN Data Submission Support
- Mobile App for Status Updates
- Patient Saturation/ED Overcrowding Scores

## Pricing

---

**Model:** enterprise

Pricing is not publicly disclosed. Contact Juvare directly for a custom quote. The software is designed for regional, state, and enterprise-level healthcare and emergency management systems.

**Target Company Size:** enterprise

## Integrations

---

Juvare Exchange, EMTrack, First Arriving Dashboards

## Compliance & Certifications

---

HIPAA, NHSN Data Submission
