Ensora Health Group

AI-enabled EHR and practice management platform for mental, behavioral, and rehabilitative health therapists and practices.

https://ensorahealth.com

Overview

The Ensora Health Platform is a comprehensive, cloud-based suite of software and services designed to streamline clinical, administrative, and financial workflows for mental, behavioral, and rehabilitative health practices. The platform unifies solutions like Ensora Mental Health (formerly TheraNest) and Fusion (for rehab therapy) into a single, secure system.

Key Benefits and Value Proposition: Ensora Health aims to create harmony in the healthcare community by eliminating administrative complexity, optimizing financial outcomes, and enriching the therapeutic experience. The platform's all-in-one nature allows practices, from solo practitioners to large groups and CCBHCs, to manage all aspects of their business in one place, reducing the need for disparate apps and login fatigue. AI-enabled features, such as notes enhancement, help providers document faster and more accurately, giving them precious time back to focus on client care.

Main Features and Capabilities:

Electronic Health Records (EHR): Specialty-specific modules, customizable templates, and tools for creating detailed treatment plans and clinical notes.

Practice Management Suite (PMS): Appointment scheduling, automated text/email/phone reminders, staff management, and client self-service portals.

Revenue Cycle Management (RCM): Billing, claims management (CMS-1500), batch invoicing, insurance verification, and secure credit/debit/HSA/FSA card processing.

Telehealth Integration: HIPAA-compliant virtual care for secure individual and group sessions.

AI-Powered Tools: AI notes enhancement and ambient AI to assist with documentation, ensuring clinical judgment is maintained while saving hours of work each week.

e-Prescribing (eRx): Medication management and electronic prescription capabilities.

Interoperable APIs: Allows seamless integration with external data sources for a holistic client view and whole-person care.

Target Users and Use Cases:

Target Users: Mental health therapists, counselors, social workers, psychologists, physical therapists (PT), occupational therapists (OT), speech-language pathologists (SLP), and administrators.
Use Cases: Mental Health Practice Management, Behavioral Health EHR, Rehabilitative Therapy EHR, ABA Clinic Management, and Substance Use Recovery.
