

# ESO Asset Management

Cloud-based asset management software for EMS and Fire agencies to track equipment, vehicles, and consumables from procurement to retirement.

<https://www.eso.com/>

---

## Overview

---

ESO Asset Management is a specialized, cloud-based software solution designed for Emergency Medical Services (EMS) and Fire agencies to manage their critical, expensive, and sophisticated equipment, vehicles, and consumables. It is part of ESO's Logistics Management suite, providing a single, real-time source of truth for asset data across the organization.

The system tracks assets from procurement through their entire lifecycle to retirement, ensuring operational readiness and compliance. Users can access the platform from any internet-connected device, including computers, phones, and tablets, allowing for real-time updates and checks in the field. A key capability is the ability to scan an unlimited number of items via a mobile device for quick inventory and asset updates.

### Key Benefits and Features:

**Automated Tracking:** Tracks assets from procurement to retirement, including location, status, and maintenance history.

**Maintenance & Readiness:** Provides maintenance reminders and scheduling to ensure equipment and vehicles are always response-ready.

**Integrated Checklists:** Seamlessly integrates with ESO Checklists to streamline daily station, equipment, and vehicle checks with intuitive workflows.

**Reporting & Compliance:** Offers built-in and configurable dashboards with granular reporting to track lifetime value, assess fleet status, and help maintain compliance and decrease liability.

**Mobile Access:** Supports mobile barcode/RFID scanning and access from any device for in-field data entry and management.

**Accountability:** Helps improve department accountability and provides data for capital planning and budgeting for future needs.

## Key Features

---

- Automated Asset Tracking
- Maintenance Reminders and Scheduling
- Mobile Barcode/RFID Scanning
- Real-time Location and Status Tracking
- Integrated Daily Checklists
- Configurable Dashboards and Reporting
- Lifetime Recordkeeping and Performance History
- EMS Fleet and Apparatus Management

## Pricing

---

**Model:** enterprise

Pricing is not publicly disclosed and is typically subscription-based for enterprise-level agencies. Contact ESO Sales for a quote.

**Target Company Size:** medium, enterprise

## Integrations

---

ESO Checklists, ESO Inventory, ESO Health Data Exchange (HDE), ESO Fire Records Management System (RMS)

## Compliance & Certifications

---

HIPAA
