

# F1RSTAnalytics AR Dashboard

An Accounts Receivable (AR) management dashboard for anesthesia practices, providing actionable, drill-down insights into revenue cycle performance.

<https://www.anesthesiallc.com>

---

## Overview

---

The F1RSTAnalytics AR Dashboard is a core component of the F1RSTAnalytics suite by Anesthesia Business Consultants (ABC), a leading provider of billing and practice management for the anesthesia and pain management specialty since 1979 . The dashboard is specifically designed to help anesthesia practices quickly understand and address issues within their Accounts Receivable (AR) and revenue cycle . It provides a visual display of critical AR measures, offering granular insight into revenue generation by facility, reporting class, provider, and procedure .

### Key Capabilities:

**Actionable Insights:** Presents data in a visual, dashboard format to overcome "data overload" and highlight what matters for productive business decisions .

**Trend Analysis:** Allows users to easily see year-over-year trends and track performance .

**Drill-down Reporting:** Provides a set of performance reports that offer drill-down capabilities into detailed data for further investigation .

**Mobile Access:** The dashboards run on both laptops and mobile devices, ensuring actionable insight is available at the user's convenience .

The software is accessed securely through the proprietary F1RSTClient portal . It is built on the foundation of ABC's proprietary, Oracle-based F1RSTAnesthesia billing software, ensuring deep integration with the core RCM process . The target market includes anesthesia practices ranging from small groups of three or more providers up to the largest physician-anesthesiologist groups .

## Key Features

---

- Accounts Receivable (AR) Performance Tracking
- Revenue Breakdown by Facility, Provider, and Procedure
- Year-over-Year Financial Trend Analysis

- Drill-down Performance Reporting
- Secure Client Portal Access
