Flatiron Insight

A flexible, customizable analytics platform for oncology practices to monitor financial and operational health metrics.

https://example.com/1762583716456

Overview

Flatiron Insight™ is a specialized analytics platform that is part of the Flatiron Health OncoCloud software suite, designed specifically for community oncology practices and cancer centers. It serves as a flexible and customizable tool for monitoring a practice's financial and operational health by unlocking and delivering insights from EHR, practice management, and billing data via clean, actionable dashboards.

Key Capabilities:

Financial & Operational Health Monitoring: Tracks key metrics such as drug usage, patient visit volumes, and inbound referrals.
Revenue Optimization: Features like Billing Insights (part of the related OncoAnalytics) enable providers to identify and recover charges for missed or incorrectly billed drugs, and adjust internal workflows to prevent future errors.
Value-Based Care Reporting: Supports participation in value-based payment models by providing practice, physician, and patient-level quality performance tracking and reporting.
Integration: Seamlessly integrates with other components of the OncoCloud suite, including OncoEMR® (EHR) and OncoBilling®, to provide comprehensive business intelligence.
Flatiron Insight is designed to help oncology providers thrive in the current healthcare environment by enhancing patient care, optimizing workflow, and providing the data-driven clarity needed for business management.

Key Features

- Financial and Operational Dashboard

- Drug Usage and Utilization Tracking

- Patient Visit Volume Analysis

- Inbound Referral Monitoring

- Value-Based Care Performance Reporting

- Billing and Charge Recovery Insights

- Customizable Analytics
