Flobotics RPA

An RPA and Intelligent Automation development and consulting agency specializing in building custom, high-ROI automation solutions for industries like healthcare RCM and finance.

https://flobotics.io

Overview

Flobotics is an agile Robotic Process Automation (RPA) and Intelligent Automation development and consulting agency. They do not offer a single, off-the-shelf software product, but instead provide 360-degree process automation services to build custom software bots for clients, leveraging technologies like UiPath, Robocorp, and Power Automate.

Their service model is end-to-end, covering process discovery and audit, Proof-of-Concept (PoC) design, full-scale multi-departmental RPA bot development, implementation, infrastructure setup, and post-development maintenance.

Key Benefits & Value Proposition:

High ROI: Clients report an average Return on Investment (ROI) of 350% from a single automation.
Expertise: The team consists of consultants and developers sourced from the "Big Four" of consulting (PwC, EY, KPMG, Deloitte), ensuring high technical and business expertise.
Industry Focus: They have deep experience in complex, regulated industries, including a strong focus on Healthcare Revenue Cycle Management (RCM), Finance & Accounting, and Logistics.
Compliance: Solutions are built to comply with industry-specific regulatory regimes, such as HIPAA for healthcare and FFIEC for finance.
Target Users and Use Cases (Biotech/Healthcare Focus): Flobotics specializes in automating complex processes within the healthcare sector, including:

Revenue Cycle Management (RCM) Automation
AI-Powered Claims Processing and Denial Management
Prior Authorization and Benefit/Eligibility Verification

Medical Coding and Charge Capture

EHR Integration and Interoperability (connecting legacy systems, CRMs, and Practice Management Systems)

Patient Registration and Appointment Scheduling

By automating these tedious, rule-based tasks, Flobotics helps organizations reduce operational costs, eliminate errors, ensure compliance, and free up staff for higher-value activities.

Key Features

- Process Discovery & Audit

- Custom RPA Bot Development

- EHR/System Integration & Interoperability

- Revenue Cycle Management Automation

- RPA Team Augmentation & Training

- Post-Development Maintenance & Support

Pricing

Model: enterprise

Project-based pricing. The average cost for one custom RPA bot is typically between $5,000 and $15,000. Hourly rates for consulting and development are $50 - $99/hr. A complimentary consultation session is offered to assess automation potential and calculate ROI.

Starting at: USD $5000

Target Company Size: startup, small, medium, enterprise

Integrations

UiPath, Robocorp, Power Automate, Python, OpenAI/ChatGPT, EHR Systems, CRM Systems

Compliance & Certifications

HIPAA, FFIEC
