

Foothold Technology

Cloud-based Electronic Health Record (EHR) and care management platform for human services, behavioral health, and I/DD agencies.

<https://footholdtechnology.com>

Overview

Foothold Technology offers a comprehensive, cloud-based Electronic Health Record (EHR) and care management platform, with its flagship product being AWARDS. The software is specifically designed for human service professionals and agencies across the spectrum, including those serving behavioral health, mental health, substance use disorder, intellectual and developmental disabilities (I/DD), supportive housing, and care coordination.

The platform aims to streamline administrative tasks and enhance care delivery by providing full functionality for case management, client tracking, and treatment planning. A key feature is the integrated billing system, which ties service documentation directly to claims for a more efficient and accurate revenue cycle.

Foothold is a federally certified EHR for Meaningful Use and is HIPAA-compliant, ensuring the safeguarding of electronic protected health information (ePHI). The company is also a Certified B Corporation, committed to high standards of social and environmental performance.

Beyond the core software, Foothold offers full-service implementation, training, and ongoing support, positioning itself as a partner to its client agencies. The system supports interoperability with Health Information Exchanges (HIEs), labs, and pharmacies to facilitate coordinated care.
