

Healthicity Audit Manager

Cloud-based medical auditing software that streamlines audit workflows, management, education, and reporting for healthcare organizations.

<https://www.healthicity.com>

Overview

Healthicity Audit Manager (also referred to as Audit Manager+) is a comprehensive, cloud-based medical auditing solution designed to simplify medical documentation and coding reviews for healthcare providers and consulting organizations. The platform combines advanced workflow management features with sophisticated auditing tools to streamline the entire audit process and ensure accurate results.

Key Benefits and Capabilities:

Efficiency and Revenue: Users can improve auditing efficiency by up to 40%, minimize claim denials, and identify up to 10% in missed revenue.

Parallel Auditing: The solution offers unique parallel auditing capabilities, allowing auditors to review a provider and a coder simultaneously within the same encounter.

Coding and Compliance: It supports auditing of E/M, CPT®, HCPCs, ICD9, and ICD10 Codes, and includes a built-in E/M calculator for automatic code calculation.

Customization: The software features customizable audit templates, checklists, and scoring rules to reflect specific organizational requirements and ensure consistent language across the audit management lifecycle.

Oversight and Reporting: A centralized dashboard allows users to track and manage audit projects, view individual assignments, and run multi-level reports that scale from individual line items to organization-wide insights. It also includes QA Oversight features for quality review workflows.

Education: The platform integrates training modules to assign courses based on identified deficiencies, enhancing accuracy and efficiency in audits.

Audit Manager is a web-based, easy-to-use solution that centralizes audit workflow, management, education, and reporting into one platform.
