HybridChart

Mobile rounding and workflow solution for physicians, specializing in charge capture, census management, secure messaging, and discharge planning.

https://hybridchart.com

Overview

HybridChart, featuring the EVOLVE platform, is a cloud-based, physician-designed mobile rounding and workflow solution that optimizes the entire inpatient workflow. Developed by a practicing cardiologist, the platform eliminates paper-based processes, reduces billing cycles, and saves time by combining essential features into one intuitive desktop and mobile application.

Key Capabilities and Benefits:

Mobile Charge Capture: Allows physicians to capture charges in as little as 3 seconds at the point of care, with multiple layers of protection against missed charges, which can lead to significant revenue increases.

Census Management: Provides an organized system for managing rounds, team collaboration across multiple facilities, and boosts efficiency with automated Admission, Discharge, and Transfer (ADT) feeds from hospitals.

Secure Messaging: Offers HIPAA-compliant communication with patient-specific chat rooms, ensuring all team members have visibility and preventing communication silos.

Discharge Planning: Bridges the gap between inpatient and outpatient care by flagging discharged patients and enabling staff to proactively arrange follow-up appointments, which has been shown to improve Transitional Care Management (TCM) participation.

Data Insights & Reporting: Provides robust reporting functionalities to help practices find and remove bottlenecks, measure efficiency, and make data-driven decisions.

HybridChart offers a comprehensive product suite, including **EVOLVE** (the core mobile rounding solution), **ALTITUDE** (an enterprise solution for managing multiple disciplinary physician groups), and **SWITCHBOARD** (a solution for resellers and practice consultants). It is highly customizable and integrates seamlessly with existing Electronic Health Record (EHR) and medical billing software.

Key Features

- Mobile Charge Capture (3-second entry)

- Active Census Management (with ADT Feeds)

- HIPAA-Compliant Secure Messaging

- Discharge Planning & TCM Management

- Robust Reporting & Data Analytics

- Single Sign-On (SSO)

- End-of-Stay Reconciliation

- Customizable SuperBill

Pricing

Model: subscription

Pricing is not publicly disclosed and requires contact with the vendor for a quote. The company offers a free trial and practices report seeing a return on investment (ROI) in under two months.

Target Company Size: startup, small, medium, enterprise
