ICD10Data.com

The Web's Free ICD-10-CM/PCS Medical Coding Reference for fast lookup of diagnosis and procedure codes.

https://www.icd10data.com

Overview

ICD10Data.com is a comprehensive, free reference website designed for the fast lookup of all current American ICD-10-CM (diagnosis) and ICD-10-PCS (procedure) medical billing codes. The platform is an essential tool for medical coders, billers, and healthcare professionals navigating the complexities of the ICD-10 coding system.

Key features include a powerful search engine for code lookup by keywords, the ability to browse through detailed code descriptions, and find related procedure codes. The site provides clear access to the latest updates on coding guidelines and explanations for each code's use case, helping users stay compliant with evolving healthcare regulations.

A crucial feature is the conversion tool that provides crosswalks to convert ICD-10-CM/PCS codes to and from ICD-9-CM codes, which is useful for historical data and transitional purposes. The platform also includes comprehensive reference materials such as the ICD-10-CM Indexes, Tables of Drugs and Neoplasms, and detailed coding rules (e.g., Newborn, Pediatric, POA Exempt Codes).

While the core reference tool is entirely free and supported by advertising, ICD10Data.com also offers a separate, custom data licensing service for businesses that require raw ICD-10 data files for integration into their own systems.

Key Features

- Fast ICD-10-CM/PCS code lookup

- ICD-9-CM to ICD-10-CM/PCS conversion crosswalks

- Detailed code descriptions and inclusion/exclusion notes

- Alphabetical and tabular indexes

- Tables of Drugs and Neoplasms

- Current code set updates (New, Revised, Deleted codes)

- ICD-10 Coding Rules reference

Pricing
