

iCoder

A multi-platform medical coding application for CPT®, ICD-10, HCPCS, and NDC code lookup, NCCI edits checking, and RVU calculation.

<https://icoder.info>

Overview

iCoder is a comprehensive medical coding software designed to streamline the workflow for busy medical professionals, coders, and billers. It serves as a single, constantly updated source for critical coding information, aiming to replace the need for physical code books and multiple websites. The software is developed by StarInix Corporation and has been on the market for over ten years, trusted by thousands of users.

Key Features and Capabilities

Intelligent Code Search: Instantly look up CPT®, ICD-10, HCPCS, and NDC codes, even with typos or partial terms.

Built-In Compliance: Includes a lightning-fast NCCI edits checker for up to 10 codes at a time, ensuring accuracy and compliance.

Reimbursement Tools: View RVUs, GPCI-adjusted values, modifiers, DRGs, and HCCs. It also features an Anesthesia Fee Calculator and ASA Crosswalk® results.

Cross-Coding: Instantly see which ICD-10 codes align with CPT® selections, with the ability to prioritize favorite diagnostics.

ICD-10-PCS Builder: Construct PCS codes step-by-step.

Code Vision: A bonus feature that allows users to snap a picture of a code for instant lookup.

Organization: Save unlimited favorites in custom folders and add detailed notes (with headers and external links) to each code for quick reference.

Multi-Platform & Offline Access: Available on iPhone, Android, Mac, and Web. Favorites and recent codes are securely stored on the cloud and synchronized across all devices, allowing users to work offline.

Data Updates: The software is always up-to-date, using the latest data from CMS, and notifies users when new updates are available.

Target Users and Use Cases

iCoder is primarily designed for individual medical professionals and small practices, including busy medical professionals, healthcare coders, medical billing and coding students, physicians, and physician assistants.

Primary Use Cases:

Medical Coding and Billing
Compliance Checking (NCCI edits)
Fee Calculation (Anesthesia/RVU)
Diagnostic-Procedure Cross-Referencing
Quick Code Lookup for Clinical Documentation

Key Features

- CPT/ICD-10/HCPCS/NDC Code Lookup
- Intelligent Search (typo/partial term support)
- NCCI Edits Checker
- RVU and GPCI-Adjusted Value Calculation
- Anesthesia Fee Calculator & ASA Crosswalk
- ICD-10-PCS Builder
- Code Vision (Image Lookup)
- Offline Access with Cloud Sync
- Custom Favorites & Notes
- CMS Data Updates

Pricing

Model: subscription

Subscription starts at \$79.99 per year, which is advertised as the most affordable coding app. A 30-day risk-free trial is available, and the company states there are no auto-subscriptions after the trial.

Starting at: USD \$79.99

Target Company Size: startup, small
