

iKnowMed

The specialized Electronic Health Record (EHR) system for oncology and hematology practices, providing comprehensive treatment decision support and practice management tools.

<https://www.mckesson.com>

Overview

iKnowMed, a product of McKesson's Ontada business unit, is a specialized Electronic Health Record (EHR) system explicitly designed for the complex needs of oncology and hematology practices. Developed in collaboration with oncologists, the system aims to streamline clinical workflows, enhance patient safety, and improve practice efficiency.

Key Features and Capabilities:

Oncology-Specific Regimen Library: Provides up-to-date, customizable treatment regimens and supports chemotherapy ordering and nursing documentation.

Point-of-Care Treatment Decision Support: Integrates with clinical pathways, such as NCCN Guidelines™ and CDS Clearinghouse, to offer real-time, evidence-based treatment recommendations.

Biomarker Management: Streamlines genetic and molecular testing with integrated diagnosis-level recommendations and ordering capabilities.

Practice Management Integration: Includes robust features for financial reporting, compliance tracking, quality measure monitoring, and inventory management (via Lynx Mobile integration).

Patient Engagement: Features the My Care Plus patient portal for secure communication, patient education, and access to personal health records.

Mobile Access: The iKnowMed Generation 2 platform is cloud-based and includes a secure iOS mobile app, allowing providers to access patient charts and appointments from virtually any location.

Target Users and Use Cases: iKnowMed is designed for oncology practices of all sizes, from small clinics to large cancer care centers. Its primary users include Oncologists, Hematologists, and medical administrators seeking a highly specialized platform to manage complex cancer care, ensure compliance, and optimize financial performance.
