ImagineOne

All-in-one, AI-powered Revenue Cycle Management (RCM) platform for high-volume, multi-specialty medical billing with up to 95%+ automation.

https://example.com/1762583716458

Overview

ImagineOne is the next-generation, all-in-one Revenue Cycle Management (RCM) platform developed by ImagineSoftware, designed to serve high-volume physician groups, independent practices, and medical billing companies across more than 47 medical specialties in the United States.

The platform unifies the entire RCM process, from pre- or point-of-service through to zero balance, into a single, intuitive ecosystem, eliminating the need for fragmented, bolt-on solutions. Its core technology, 'Quantum Leap Automation,' leverages both Artificial Intelligence (AI) via ImagineCo-Pilot® and Robotic Process Automation (RPA) to drive up to 95%+ automation of the RCM workflow. This automation is engineered to result in significant benefits, such as a reported 400% increase in staff productivity and a 75% reduction in labor effort.

Key capabilities include advanced EDI solutions (clearinghouse, bank posting, eligibility, and prior authorization), intelligent patient engagement and payment collection solutions (ImagineEngagement™ and ImaginePay™), and sophisticated analytics via ImagineIntelligence™ for real-time insights, predictive forecasting, and automated MIPS compliance. The platform is a cloud-based SaaS solution built on a modular, API-driven architecture, making it suitable for complex, high-volume specialties like Radiology, Anesthesiology, Pathology/Lab, and Emergency Medicine.

Key Features

- AI-Powered Revenue Cycle Automation (ImagineCo-Pilot)
- Multi-Specialty Billing Platform (47+ specialties)
- Intelligent Patient Engagement & Payments (ImagineEngagement™)
- Advanced RCM Analytics & Reporting (ImagineIntelligence™)
- Advanced EDI Solutions (Clearinghouse, Eligibility, Prior Authorization)
- Command Center for Workflow Configuration
- Virtual Assistant (Co-Pilot Chat)
