

ImPACT

FDA-cleared computerized neurocognitive assessment aid for concussion management, used for baseline and post-injury testing.

<https://impactconcussion.com>

Overview

ImPACT (Immediate Post-Concussion Assessment and Cognitive Testing) is the most scientifically validated, FDA-cleared computerized neurocognitive evaluation system, supported by over 750 published research studies. It is the gold standard used by thousands of healthcare professionals, schools, and sports organizations worldwide to aid in the assessment, management, and safe return-to-activity decisions following a concussion. The core product, ImPACT, is for ages 12-80, with a comprehensive suite that includes ImPACT Pediatric (ages 5-11) and ImPACT Quick Test (a sideline screening tool for removal from activity decisions).

The test is administered online via a secure web portal on a desktop, laptop, or iPad, and takes approximately 20-25 minutes. It objectively measures key areas of cognitive function, including visual and verbal memory, reaction time, and processing speed. The platform provides comprehensive clinical reports, age-referenced normative comparisons, and injury reports to help clinicians make informed decisions. ImPACT Applications is committed to data security and compliance, holding certifications like HIPAA, GDPR, SOC 2 Type 2, and ISO 13485.

Key Features

- FDA-cleared computerized neurocognitive testing
- Baseline and post-injury testing
- Measures memory, reaction time, and processing speed
- Clinical reports with composite and standard scores
- ImPACT Pediatric for ages 5-11

- ImPACT Quick Test for sideline screening
- Large, validated normative data set
- Electronic Medical Record (EMR) integrations

Pricing

Model: subscription

Annual subscription packages for schools/leagues start at \$462/year, which includes a limited number of baseline/post-injury tests and an unlimited ImPACT Quick Test license. Higher tiers offer more tests, live support, and a dedicated account manager. Pricing for healthcare providers is also available, often requiring a quote.

Starting at: USD \$462

Target Company Size: small, medium, enterprise

Integrations

EMR systems, HEADCHECK Health

Compliance & Certifications

HIPAA, GDPR, PIPEDA, UK GDPR, Australia Privacy Act, ISO 13485, SOC 2 Type 2, FDA-Cleared Medical Device
