InnoMaint

Cloud-based CMMS and EAM software for monitoring, measuring, and managing all asset and equipment maintenance activities via web and mobile applications.

https://innomaint.com/

Overview

InnoMaint is a cloud-based Computerized Maintenance Management System (CMMS) and Enterprise Asset Management (EAM) solution designed to help businesses of all sizes monitor, measure, and manage their maintenance activities. The platform is accessible via web and native iOS/Android mobile applications, aiming to enhance asset reliability, reduce equipment downtime, and minimize operational repair expenses by replacing manual tracking methods.

Key capabilities include Asset Management, Preventive Maintenance scheduling (based on time, usage, or condition), Work Order Management, Spare Parts and Inventory Control, and Vendor Management. For field technicians, the mobile app offers offline mode functionality, QR/Bar code scanning for instant asset history, and a 'Solution Bank' for step-by-step fix instructions. The system provides robust Reporting and Analytics through customizable KPI Dashboards.

It supports multi-site management and offers advanced features in its Enterprise plan, such as Custom API Integration, IoT OEE/Energy Monitoring, and Single Sign-on (SSO). InnoMaint is used across various industries, including Healthcare, Manufacturing, Oil, Gas & Utilities, and Facility Management.

Key Features

- Asset Management & Tracking

- Preventive & Predictive Maintenance

- Work Order Management

- Mobile App with Offline Mode

- Inventory & Spare Parts Management

- Compliance Management & Safety Checklists

- Real-Time Reporting & KPI Dashboards

- QR/Bar Code Scanning

- IoT Monitoring (OEE, Energy, Condition)

- Single Sign-On (SSO)
