

IntelliLogix

Web-based MDS scrubbing and data analytics solution for skilled nursing facilities to optimize reimbursement, boost Five Star Ratings, and ensure CMS compliance.

<https://www.shpdata.com>

Overview

IntelliLogix is Strategic Healthcare Programs' (SHP) web-based performance improvement solution designed for Skilled Nursing Facilities (SNFs) and other Long-Term Post-Acute Care (LTPAC) providers. The software focuses on improving clinical, financial, and operational outcomes through real-time data analytics and benchmarking.

Key Benefits and Value Proposition:

Optimize Reimbursement: The core feature is the **MDS Scrubber**, which automatically identifies inconsistencies and fatal errors in Minimum Data Set (MDS) files before submission to CMS, helping facilities maximize revenue and ensure accuracy.

Improve Quality and Outcomes: It provides tools to proactively manage and boost Five Star Ratings, Quality Measures, and reduce readmissions.

Survey Readiness: Offers actionable analytics and reports, like the Pin Point Prediction Report, to help facilities prepare for surveys, minimize citations, and identify at-risk residents.

PDPM Navigation: Helps organizations successfully navigate the Patient-Driven Payment Model (PDPM) with relevant alerts and optimization tools.

Main Features and Capabilities:

MDS Scrubber: Automated system that integrates with all major EHRs to extract MDS data and identify errors impacting reimbursement and quality scores.

Performance Dashboard: A customizable dashboard with powerful, adjustable widgets that provide a bird's-eye view of performance with drill-downs to detailed reports.

Star Ratings Management: Proactive tools and "what-if" scenarios to understand and manage the impact of performance on Five Star Ratings.

Compliance Tools: Includes PBJ Manager (Payroll-Based Journal) and CASPER Manager (Certification and Survey Provider Enhanced Reports) for quality reporting and compliance.

Predictive Analytics: Integrates data into a suite of insightful reports and predictive analytics, leveraging the industry's largest benchmark database for comparisons.

Target Users and Use Cases: IntelliLogix is built for administrators, clinical managers, and financial teams within Skilled Nursing Facilities and LTPAC organizations who are responsible for regulatory compliance, quality improvement, and financial performance. The system is designed to transform clinical and financial data into operational reports for collaborative management and daily decision-making.

Key Features

- MDS Scrubber and Error Correction
- PDPM Optimization and Alerts
- CMS Five Star Rating Management
- Survey Preparation and Risk Analysis
- Real-Time Data Analytics & Benchmarking
- Customizable Performance Dashboard
- PBJ and CASPER Manager
- Reimbursement Optimization

Pricing

Model: enterprise

Pricing is not publicly disclosed but is described as having a "very flexible cost" and "affordable all-inclusive pricing." The solution is proven to deliver a high Return on Investment (ROI), with some customers seeing an average 16X ROI. Pricing is likely based on facility size or number of beds/users and includes unlimited training and support.

Target Company Size: small, medium, enterprise

Integrations

All major EHR vendors (via secure interfaces)

Compliance & Certifications

HIPAA
