Overview

Intrigma is an AI-powered, cloud-based healthcare workforce scheduling solution designed to simplify the complex processes of physician, nurse, and staff scheduling for hospitals, medical groups, and health systems. The platform's core value proposition is to reduce administrative burden, combat employee burnout, and optimize staffing levels to cut costs and improve staff morale through fair, transparent, and flexible scheduling practices.

Key features include advanced automated scheduling, which utilizes fairness-based algorithms to track and ensure equitable distribution of workloads, including calls, weekends, and holidays. The system also offers a Real-Time Shortage Response tool to fill open shifts efficiently.

Intrigma supports specialty-specific scheduling for over 20 healthcare fields, such as Emergency Medicine, Radiology, and Anesthesiology, and is built to handle multi-specialty and multi-location environments. Staff can manage their work-life balance using the native mobile apps for iOS and Android to view schedules, submit time-off requests, and swap shifts with administrative oversight.

For administrators, the platform includes a PayManager module for payroll integration and computing various pay rates, including overtime and differential calculations. It also provides robust compliance and credential management features. Intrigma prioritizes data security and compliance, adhering to HIPAA and ePHI standards, and holds annual SOC 2 Type 2 and HITRUST certifications.
