Overview

IodineCDI, part of the Iodine Software suite, is an AI-powered Clinical Documentation Integrity (CDI) solution designed to optimize the mid-revenue cycle for hospitals and large health systems. The software is driven by **IodineIQ**, a proprietary AI engine utilizing a hybrid model that blends Generative AI, Large Language Models (LLMs), Natural Language Processing (NLP), and machine learning to emulate clinical judgment.

The core value proposition of IodineCDI is to drive consistent and accurate revenue capture by transforming CDI workflows and significantly reducing manual workloads. The system prioritizes cases based on real-time data, clinical complexity, and financial impact, ensuring CDI professionals focus on high-impact cases.

Key components of the solution include: **Concurrent™** for prioritizing charts likely to contain inconsistencies between clinical evidence and documentation during the patient stay; **IodinePreBill** (formerly Retrospect™) for post-discharge auditing to capture additional revenue and minimize denial risk; and **Interact™** for streamlining physician query management and engagement.

IodineCDI integrates seamlessly with Electronic Health Record (EHR) systems, providing a comprehensive platform that helps CDI specialists and HIM leaders improve query volumes, accelerate chart reviews (with reported time savings), and ensure compliance. The solution has been recognized as a leader in the CDI market, including winning "Best in KLAS" awards.

Key Features

- AI-driven Case Prioritization (IodineIQ)

- Concurrent CDI Review (Concurrent™)

- Retrospective/Pre-Bill Review (IodinePreBill)

- Physician Query Management (Interact™)

- Natural Language Processing (NLP) & Generative AI

- EHR/EMR Integration

- Denial Prevention and Management

- ICD-10 Compliance

Pricing

Model: enterprise

Enterprise-level, outcomes-based pricing model for hospitals and health systems. Pricing is not publicly disclosed; contact vendor for a custom quote.

Target Company Size: enterprise

Integrations

EHR/EMR Systems

Compliance & Certifications

HIPAA, HITRUST, SOC 2
