Overview

Kipu Health MAT is a specialized module integrated within the comprehensive Kipu EMR platform, purpose-built for Opioid Treatment Programs (OTPs) and Office-Based Opioid Treatment (OBOT) facilities. It is designed to simplify the complex workflows, strict regulatory requirements, and patient management associated with Medication Assisted Treatment (MAT).

The solution streamlines the entire treatment process by managing all types of medication orders, including standard, titration, taper, and interval orders, and supports e-prescribing. A key feature is the intuitive dosing and dispensing workflow, which includes ready-to-use integration with liquid dispensing pumps like Ivek and SciLog. To enhance patient flow and operational efficiency, the system offers a self-service kiosk for patient check-in and customizable queue management.

Compliance is a core focus, with built-in features for DEA-compliant inventory management, automated patient outreach, and advanced reporting capabilities. The broader Kipu platform also includes Customer Relationship Management (CRM) for admissions and Revenue Cycle Management (RCM) for billing, making it an end-to-end solution for behavioral health and addiction treatment centers. The platform is HITRUST certified, ensuring a high level of security and protection for sensitive patient data.

Key Features

- Intuitive Dosing and Dispensing Workflows
- E-prescribing and Medication Order Management
- Self-Service Kiosk and Queue Management

- DEA-Compliant Inventory Management
- MAT Titration and Taper Orders
- Automated Patient Outreach and Call-backs
- Integrated Patient Ledger and Billing
