Kitman Labs Performance

An all-in-one Performance Intelligence Platform (iP) for elite sports and defense organizations to unify data, optimize performance, and manage risk.

https://www.kitmanlabs.com

Overview

Kitman Labs Performance is a core solution within the Kitman Labs Intelligence Platform (iP), which serves as a single, centralized operating system for performance intelligence in elite sports and defense organizations. The platform is designed to aggregate thousands of data points from hundreds of data providers (including GPS, wearables, and EMR systems) to eliminate data silos and provide a holistic, unified view of the athlete or service member.

The Performance Optimization solution specifically focuses on collecting and analyzing training load, physical performance, wellness trends, and response to programming to support individualized plans and faster, data-driven decisions.

Key Capabilities and Benefits:

Data Unification: Aggregates performance, medical, and coaching data into one interactive, cloud-based platform.

Risk Management: Features the **Risk Advisor**, a machine learning-based add-on that identifies elevated injury risks and reveals underlying contributing factors.

Mobile Engagement: Includes dedicated **Player and Coach Mobile Apps** for real-time communication, data collection (wellness/RPE), alerts, and schedule management.

Performance Analysis: Offers self-service reporting and flexible dashboards to analyze training load, physical performance, and wellness trends over time.

Compliance & Security: Built with a security-by-design model, meeting stringent international standards including HIPAA, GDPR, and ISO certifications.

The platform is utilized by over 700 elite and youth organizations globally, including teams in the NFL, NBA, Premier League, and various Defense organizations.

Key Features

- Advanced Metric Management & Monitoring

- Risk Advisor (AI/ML-based Injury Risk Prediction)

- Centralized Performance & Wellness Dashboard

- Mobile Player & Coach Applications

- Training & Participation Management

- Self-Service Reporting & Analysis

- Growth & Maturation Aware Training

Pricing

Model: enterprise

Customized enterprise pricing based on the organization's specific needs, size, and selected solutions (Performance Optimization, Performance Medicine, etc.). Contact sales for a quote.

Target Company Size: medium, enterprise

Integrations

150+ data partners (e.g., GPS, wearables), TeamBuildr, VALD Performance Data, Thousands of healthcare providers (for e-diagnostics)

Compliance & Certifications

HIPAA, HITECH, GDPR, ISO 27001, ISO 27701
