MealSuite

All-in-one foodservice management software for senior living and healthcare, offering menu planning, inventory, and dietary compliance.

https://www.mealsuite.com

Overview

MealSuite is a complete, all-in-one technology platform designed to help senior living and healthcare operators digitize their entire foodservice operation, from procurement to patient table service. The modularized system supports a continuum of care, including Independent Living, Assisted Living, Skilled Nursing, Acute Care, and Behavioral Health facilities. The core value proposition is to meet all regulatory requirements (like HIPAA and HACCP), reduce administrative labor, cut down on food waste, and optimize purchasing decisions.

Key capabilities revolve around resident-centric care, integrating resident profiles to track specific dietary needs, allergens, food textures, and preferences. The system features a vast database of over 9,000 regular and therapeutic recipes, curated by registered dietitians, which are HACCP-ready and include nutritional data. Menu planning is streamlined with tools for costing, forecasting, and ensuring menus align with budget and nutritional goals.

For front-of-house operations, MealSuite offers TOUCH technology, including tablets for tableside and bedside ordering, self-service kiosks, and digital menu boards. The back-of-house is automated with Paperless Kitchen Solutions, which digitize production steps, display scaled recipes on Kitchen Management System (KMS) screens, and handle food safety tracking with real-time reports and alerts. The platform also features a fully integrated Point of Sale (POS) system and a 'Connect' interface for seamless integration with Electronic Health Records (EHR) systems like PointClickCare.

Key Features

- Menu Planning & Customization
- Recipe Management (9,000+ therapeutic recipes)

- Nutritional Analysis & Dietary Management

- Inventory Management & Cost Control

- Production Management (Paperless Kitchen)

- Point of Sale (POS) & TOUCH Technology

- Resident/Patient Profile Management

- EHR Integration (Connect Interface)
