Overview

MedeAnalytics Revenue Integrity is a powerful data analytics solution designed for healthcare providers, including hospitals and health systems, to gain complete visibility into their "mid-cycle" performance—the critical point between patient access and the business office where clinical operations impact revenue. The solution is part of the broader Revenue Integrity Suite, which includes specialized modules like **Audit Monitor**, **Compliance+**, **CDI Insights**, and **Physician Insights**.

The platform's core value proposition is to maximize reimbursements, minimize audit risks, and ensure documentation, coding, and compliance performance are optimized. It leverages an intelligent, cloud-based platform with advanced analytics, including machine learning, guided analysis, and predictive analytics, to deliver actionable, evidence-based insights.

Key Features and Capabilities:

Audit Monitor: Comprehensive tracking and management of government and commercial audits with robust workflow tools.

Compliance+: A risk rules engine to proactively identify potential billing and coding risks, including mid-cycle denials and PEPPER analysis.

CDI Insights (Clinical Documentation Improvement): Consistent reporting on coding trends and clinician documentation to increase specificity and reduce denials.

Physician Insights: Complete data sets and dependable analytics to foster provider performance improvement and targeted training.

Executive Dashboards: Top-level, easy-to-interpret data visualizations for a single view into revenue improvement areas.

Drill-Down Analytics: Granular data analysis to pinpoint root causes of denials and identify physician-level insights.

Real-Time Benchmarking: Compare performance metrics against peers across the nation.

Target Users and Use Cases:

The primary users are CFOs, CMOs, Revenue Cycle Managers, CDI specialists, Audit teams, and Compliance officers at large healthcare organizations, including hospitals and health systems. The main use cases are: revenue capture optimization, audit defense, clinical documentation improvement (CDI), compliance risk mitigation, and physician performance management to support the transition to value-based care.

Key Features

- Audit Monitor (Government/Commercial Audits)
- Compliance+ Risk Rules Engine
- CDI Insights (Clinical Documentation Improvement)
- Physician Performance Analytics
- Mid-Cycle Denials Management
- Real-Time Benchmarking
- AI and Predictive Analytics
- Executive Dashboards with Drill-Down
