

# Medicat Sports Medicine

A complete Electronic Health Record (EHR) solution for college and university athletic training and sports medicine clinics.

<https://medicat.com>

---

## Overview

---

Medicat Sports Medicine is a comprehensive EHR solution designed specifically to meet the unique needs of college and university athletic training and sports medicine facilities. It provides a single, secure, web-based platform to manage the entire athletic training workflow, from the clinic and training room to the practice field.

The solution drives results by streamlining documentation, reports, and athlete demographics into a unified system. Its robust mobile features enable athletic trainers to document injuries, treatments, and sideline care anywhere, anytime. The platform facilitates secure and efficient communication between athletes, athletic trainers, physicians, coaches, and other members of the athlete's care network.

### Key Capabilities:

**Athlete Portal:** Provides athletes with single-source access to scheduling, health history forms, secure messaging, and resources, empowering them to manage their own health and compliance.

**Clinical Tools:** Includes essential diagnostic and wellness tools for managing conditions like concussions (concussion protocol), mental health assessments, and injury tracking.

**Interoperability:** Integrates seamlessly with other Medicat modules (Medical EHR, Counseling EHR, Immunization Compliance) to ensure a single, holistic student-athlete record across campus health services.

**Compliance & Security:** Built on a private cloud platform with industry-leading security, consistent with HIPAA and SOC 2 guidelines.

Medicat serves as a partner to campus health organizations, offering exceptional support, training, and implementation services to ensure a successful launch and high customer retention.

## Key Features

---
