

Morgan Scientific ComPAS2

Next-generation Pulmonary Function Testing (PFT) software that features EMR integration, remote interpretation (Task Manager), and compliance with the latest ATS/ERS guidelines.

<https://www.morgansci.com>

Overview

ComPAS2 is the next generation of best-in-class Pulmonary Function Testing (PFT) software, built on the highly-rated ComPAS platform and infused with the latest coding standards and customer feedback . It is designed to revolutionize PFT by combining an exquisitely redesigned user interface with state-of-the-art processing for today's data integration needs . The software is compliant with the 2019 ATS/ERS standards and the latest guidelines for spirometry, reporting, and interpretation . Key features include exceptional reporting capabilities with instant rendering and customizable templates, unique remote interpretation via **ComPAS2 Task Manager**, and real-time billing tools . It supports workflow flexibility for data sharing and seamless integration with the top twenty EMRs . The software is an enterprise-class solution that meets the latest regulatory and cybersecurity standards, featuring end-to-end data encryption, native database encryption at rest, Single Sign-On (SSO) with Windows Domain Authentication, and a detailed audit trail . Target users include large teaching institutions, clinical institutions, research/academic centers, private pulmonologists, and IT managers .

Key Features

- Pulmonary Function Testing (PFT) & Spirometry
- EMR Integration (Top 20 EMRs)
- Remote Interpretation (ComPAS2 Task Manager)
- ATS/ERS Standards Compliance
- End-to-End Data Encryption

- Real-Time Billing Tools
- Customizable Reports & Instant Rendering
- Single Sign-On (SSO)

Pricing

Model: enterprise

The software is licensed, not sold, and guarantees updates, support, and customized reports for the cost of testing a few patients per year . Pricing is not publicly disclosed; contact the company for a quote or a complimentary demo .

Target Company Size: medium, enterprise

Integrations

EMR Systems, ZEPHYRx (Home Spirometry)

Compliance & Certifications

ATS/ERS Standards (2019), GLI Mapping
