

Netsmart myUnity

A cloud-based Electronic Health Record (EHR) platform unifying clinical, operational, and financial workflows for the post-acute care continuum.

<https://www.ntst.com>

Overview

Netsmart myUnity is an advanced, cloud-based Electronic Health Record (EHR) platform specifically designed for the post-acute care continuum, including home health, hospice, palliative care, private duty, skilled nursing, assisted living, and life plan communities . It aims to streamline and optimize care delivery by integrating clinical, operational, and financial workflows into a single, unified enterprise platform .

The solution is person-centered, providing one care plan and one bill across all service lines, which helps to reduce data entry errors, eliminate duplicate documentation, and improve organizational efficiencies . Key features include Appointment Management, Billing Management, Clinical Workflow, Document Management, Patient Portal, Reporting and Analytics, Scheduling, and e-Prescription . It also supports interoperability connections with hospitals and community partners, leveraging analytics for better outcomes and compliance . The system is designed to be scalable, supporting agencies from startups and small agencies to large enterprises .

Key Benefits

Unified Platform: Consolidates multiple service lines onto a single EHR instance.

Interoperability: Facilitates secure data exchange with Health Information Exchanges (HIEs) and external providers .

Financial Management: Supports efficient billing, claims management, and consistent cash flow .

Mobile Point-of-Care: Accessible on any device (iOS/Android/Web) for real-time access to information in the field .

Key Features

- Unified EHR for Post-Acute Care
- Integrated Clinical, Financial, and Operational Workflows
- e-Prescribing (e-Rx)
- Appointment and Schedule Management
- Patient Portal/Self-Service Portal
- Advanced Analytics and Reporting
- Interoperability and HIE Connectivity
- Billing and Claims Management
